

Our book focus this week is:

Super Duper You and
Incredible you

This week in Reception Class...

28th September 2026

We have been learning about how we are all different. The children have enjoyed sharing what makes them different.

We have also learnt about people in our community who help us and have talked about why they are important.

This week in maths the children have been comparing size, mass and capacity. They have enjoyed looking at capacity and mass during COOL time. The children have compared what is smaller and what is bigger. We have also been creating patterns.

We have had fun playing in our new water tray, the children have explored pouring, scooping and tipping.

We have enjoyed finding out about how the seasons are changing. The children have been collecting beautiful leaves, acorns and conkers for us to share.

The children have continued to practice the sounds they have been taught so far.

The children have started Drawing Club and the children have enjoyed reading the Gruffalo, creating characters, settings and adventures. The children have created their secret codes through mark making.

We learned 'h' and 'n' letter formations from the Jumper Family.

This week we have been working hard to remember the rule of keeping our hands to ourselves to ensure we all stay safe.

We are also trying to remember to flush the toilet and wash our hands. As part of managing our own personal hygiene.

The children have worked hard to develop their hand strength. We have used tweezers to pick up pom poms. The children enjoyed using the scooters. The children created an obstacle course using planks and crates learning how to balance.

The children have been using large sheets of paper and the whiteboard to draw their families. They have continued to enjoy junk modelling, creating a range of models such as boats and aeroplanes.

C of EL This week we have observed the class...

Maintaining focus on a chosen activity for a longer period of time.
